

# Idrees Ahmed Ghazi

## Web and Mobile App Developer

### Objective

I am a passionate web developer seeking an organization where I can fully utilize my skills in web development. I am eager for opportunities to learn and grow, with the aim to make a meaningful impact.

### Highlighted Projects

#### • LMS (Learning Management System)

Project was to develop a centralized platform to empower teachers to seamlessly upload course materials, quizzes, assignments, and assess mid-term and final term marks. Students to gain convenient access to these resources, while administrator to obtain valuable insights into student statistics and performance. As a lead, successfully driven and completed the project with the team by implementing the cutting-edge technologies: Express JavaScript, React JavaScript, MongoDB, Node, Tailwind CSS, and Vite JS.

#### • Renter Proprietor Coordination (RPC) System

As part of a two-member team, we created the RPC System, a user-friendly website and mobile app. We utilized technologies like HTML, CSS, Bootstrap, Firebase, and Flutter, along with an IBM chatbot. The main goal of this project was to develop an online contract system for renters and property owners, simplifying rental management and enabling convenient online payments. This experience allowed me to enhance my web and mobile development skills while demonstrating my ability to deliver effective digital solutions.

#### • Blogger App

The goal of the project was to assist bloggers to blog via smart phone vs traditional web-based blogging. Being the leader of a talented team of three, I played a key role in successfully developing blogger app by using React Native and JavaScript with additional features like the ability to monetize work through book sales, and expand their reach to readers.

#### • Bakery Management System

Covid-19 pandemic apart from its health and economic impacts, brought revolution in home delivery services. Therefore, project scope was to develop online bakery website to provide platform for the customers to buy products online while the management team can manage the data of the inventory, sales and revenue. Successfully completed the project by using HTML, CSS, Bootstrap, Php Laravel, and MySQL.

### Free Lancing Experience

- Worked online with the project manager of an Ireland-based company Happy Rebel Aut Club and developed NFTs. Based on the high quality of work, I was contacted again and further NFTs production.
- Collaborated with a client from a Gulf country, creating a customized NFT Collection tailored to their specific requirements.
- Contributed to an Incus-named NFT collection for an American project manager of a company, successfully translating their artistic vision into visually appealing NFTs.
